peak which was climbed the day before by Cecil Compton & Francis. Stayed on top long time & then descent. Seemed interminable. Crossed ice gully & cut steps on way up so used rope which I had, twice - up & down. Down shale ledges to left avoiding chimneys we climbed up.

McKaye 10:20. Rita 10:25. 9-10:30
w. walsh. Aletta K. stayed below
till 1 pm. Grand view of Ice falls
Clemenceau - Hooker + Brown etc.
Some fine smoke. Descended to
slopes just above col + found
Brussels party with glasses on
first steep pitch. Watched them
for hours. "What are they
doing now?" became slogan
of the seven of us as field glasses
passed from one to another
of us. They got half way up
+ then rule struck - tried
everything possible. Stymied
ed in Kletterschuhe. I believe
left three pitons + several
slings. Only possible route from
our viewpoint apparently
was impossible. We watched
all three look around corner

of sheer rock - no alibis allowed. Finally we saw them descend & roping off last pitch - Then we descended to rocks below. Then followed "worst half hour of mountaineering I ever participated in" So said S. Hendricks & he was right. Tried to come down ridge & after several ropings off. Started down ledges towards snow which they knew was ice. S.H. went back & down shale sensibly - R.J. slipped on ledge & just caught himself Stunnia came down chimney decided against glissade, went along cliff & finally glissaded lost balance & in spite of ice-ax broke, landed on rocks. S.H. got down first. Gibson finally traversing ledge to shale. All made me

somewhat nervous. Roped up after refreshments & Stimmia & Hendricks chose former route up on account of falling rocks. Gibson took his old route. Many anxious about them - a nervous climber. Several rocks descended. Stopped at brown rock where we had roped up on ascent. Down alplands to lakes. Night behind Gibson glad to be off rope. Slipped on rock by stream & jumped to slip again doubling up ankle beneath me. A sprain on one side of foot. Had first aid kit & bandaged it then & there. Then hobbled down - taking three hours on descent. Stirling carried me across stream with Walsh at his side.

JASPER, Alta (Canadian Press). —"The All Night Club" of the Alpine Climbers of Canada is rapidly gaining members, the main qualification being that the entrant spend the major part of the night on the peak or slopes of a high mountain.

More than ten names have been added recently to the "All Night Club" roster. Three parties from the Fryatt Creek camp in Jasper spent from dusk till dawn on the snowy slopes of the Rockies.

The first party to ascend Mount Xerxes, 9,800-foot peak, discovered and tentatively named by Alpine club officials last fall, left the main camp the other day and spent thirty-six h urs on the mountain. Dr. Max Strumia, director of Bryn Mawr (Pa.) clinic, led, with Miss Cora Sutter, Edmonton; M. C. Schellbacker, East Orange, N. J., and Walter A. Burke Jr., New York, following.

The climbers reached the peak after dark. They ran out of food and had taken no blankets, so Miss Schellbacker tore her rain coat in half and the two women used this for covering. They arrived back in camp shortly after dawn the following day.

Mount Fryatt, 11,026 feet, overlooking the camp and climbed but once before, recently has claimed several parties for an overnight stay.

With Ferris Neave of Winnipeg leading, Miss Nan McKay of Saskatoon and R. P. Cross of Chicago made a second ascent and returned the following morning. The third ascent was made by two groups.

One was led by Dr, Strumia and included Dr. Helen Zillimer, Milwaukee, and Walter A. Burke Jr. of New York. The other included R. Hird, Calgary; Howard Carlson, Brooklyn, and Mrs. McNeil, Portland, Ore.

JASPER, July 17.—The magnificent setting of the Fryatt Valley, with its great peaks, snow and ice crowned, and a veritable paradise of unclimbed mountains, will be the annual camping ground of the Canadian Alpine Club. Every other year they meet in Jasper Park and this year are located in an entirely new and almost unexplored region, with a number of peaks even yet un-named. The building of the Jasper-Banff highway has made this area accessible for exploration.

President A. S. Sibbald of Saskatoon, arrived in Jasper on Friday and left immediately for the valley with Major Tweedy of Vancouver, secretary of the club, and in charge of the arrangements.

Everything has been done to make for the success of the camp. A new trail has been cut into the valley and it is a splendid one. A scow will carry those attending the camp across the turbulent Athabaska river and a short hike will take one into the campsite right in the shadow of the great peaks.

One of the outstanding feats of the camp will be the attempted ascent of Mt. Brussels, a haughty giant of over ten thousand feet, which has turned back party after party who have attempted to scale its craggy slopes. It is hoped that mountaineering history will be made at this camp, and Mt. Brussels finally conquered.

Fryatt Creek.

Through the rushing waters.
of the Fryatt Creek.
Mountaineers are hopping.
Leaping pretty quick.
Across the rocky flats.
All of us must go.
Those who are most agile.
Think the rest are slow.
Some on the backs.
of the poor pack train.
They make the poor horse
Cross & cross again.

Once across the moraine
Bushwhack through the brush.
Hang on with your eyebrows
On the cliff you must.

Such technique is nothing
Compared to pumping streams
And the rushing waters.
Haunt us in our dreams.
Then through the tent door
Rushing in it came.
And we all went hopping.
As on the moraine.
When we come from climbing
Streams are at their height
And its even dangerous.
in the tent at night.
Water comes changing.
Through the whole camp site
Soon you needn't go outside.
To brush your teeth at night.
Watch out alpine climbers
Rush up Mt. Fryatt.
Or the mountain will be lying
On the gravel flat.

Took second section met O'Briens at Lonise & they told me Vic that I was at Bow Lake & he was taking goat truck. Just caught him in time as he was getting on truck. Took O'Briens to Lunch at Mt. Inn. ~~Two girls at station (Dorothy Spencer & Donny Clay) going in & Rocki~~ - Vic finally got R.M.T. Car, & we drove to Bow with

Bow Lake.

McConnell (blonde + blue-eyed) who has driven us many times here. Mrs. Simpson + Mary Ann Jim + Little Jimmy away on pack trip with Mr. Castle - Am to climb Obive + Gordon tomorrow Have same cabin + very comfortable.

Wed Sept 2. Rain + mist down
Walk up to "Many Lake" and back
Clearing towards evening.

Thurs Sept 3. Climb of Olive + Gordon. Start 6:50 A.M. up over chaos stone + then on left bank of left stream as far as bluffs Then crossed + up bank to steep cliff where Vic went up + gave me the rope. He tried hard place first. Then up moraine w/ scrambling. Less on descent. Got onto

St. thick snow slope with some step cutting. Vic wore crampons but I have done. up to near ridge of Olive & traversed across to main peak on rock - Vic sometimes on snow. Ate before summit. Left names in cairn. Two previous ascents recorded, one the leaves a record on skis Came down almost on ridge col. steep & rotten before reaching snow. Then over snow fields & up around crevasses on Gordon. No time to go to left Summit also. Down in same tracks & down moraine. To avoid cliff, we kept to right finally crossed creek & up on opp. bank. Left Gordon at 5:30 P.m. & got back on rock slides - Vic had flashlight

but as dayplng as heepful
at long last came down at
chock stone & to lake. Couldnt
remember where trail went.
at lake & did some bush-
whacking. Vic's flash went
out as moon came up.
over lake. Two heavens swam
in lake & mts stood out in
moonlight beautifully. was a
bit too tired to appreciate it.
To camp at five to eleven.
Mrs. Simpson worried because
she had heard avalanches
in morning & that we might
have been caught. Vic heard
some at 5 P.M. but I think
it was blasting. To climb
tomorrow.

Friday Sept 4. Decided to
stay over till Sunday & I

wired Caroline - Mrs. Simpson & many motored up to camp 13. Read & slept in shade & sun. Jim & little Jimmy came in. Mrs. Castle & son were here for lunch but left too late to catch Mr. Castle who came in at Mosquito Creek. Jim painted picture of Mt. Patterson at our bivouac & is to give it to me. To climb Mt. Baker tomorrow & start earlier.

Sat Sept 5. Climb of Mt. Rhondda - went up stream the way Chris & I went. Didn't see where we left moraine & Vic went on. Then onto ice & across glacier to snow patch. Took longer than time before. Baker in clouds

+ very far away so decide to climb Rhondda. over snow fields + around crevasses. Lots of dead birds, butterflies etc on ice. Ate lunch on snow below main peak. Up to right but not to out-cropping of rock or ridge wh. looked like obvious route. Rock on far side of ridge + we unroped + took photos. Then up on rock to rotten ridge which got rottener + steeper chunks of rock to summit. Left record in adhesive tape holder in small cairn. Took pictures esp[ecially] of Mt. Mummery which was glorious. Mt. Wellington a fine looking peak near Clearwater. Down in same

tracks. Via following hard snow over covered crevasses. Stopped on flat part of glacier & I went ahead. Down by Chris' route but crossed main stream above chock stone to avoid second stream. At camp about seven. Saw 7 little birds like sandpipers on water of lake eating insects. Like miniature ducks.

Sunday Sept 6. Left Bow's McConnell driving us back again. Picked up german man who walked into Bow yesterday & drove to Lake Louise. Two horses in corral & two girls (Dorothy Spencer & Donny Clay) at station going into Skoki waiting for gale. Went to hotel for mail &

grounds. Saw Katharine & Daisy. Lunch at Triangle Inn & returned to Station in R.M.T. Bus as all cars were out. Drove direct to canal. Vic had time to bridle Slats but I got Alberta easily - left duffle for Gabe. also the two girls whom we didn't see again till Skoki. Passed Gabe with Sir D. Ward & 2 English people, Jack Frost & party, 3 fishermen at lake leaving & 3 fishing - Saw bear at half way but it became a wolverine & then a porky when it went up a tree - Arrived about 6:30 P.M. Aida here. Donald. Ted & Allan Carscallen, Kemp & Young. Two girls arrived in middle of night with Gabe, as Allan

+ Co. had done the night before. Have room in house ~~facing~~ over front door - quieter than other over Kitchen. Allan had planned to climb Mt but young couldn't go. A. had been on trip when Mt had gone part way up + he had written to him since + asked him if he had climbed it yet. It was Mt on near side of Silverhorn as we thought. Simpson was wrong.

Mon. Sept 7. Rain. Walked around SRoRi Mt in afternoon Saw no game only Donald wrangling horses - On way back came upon mud hole smelling of Lysol. Bushwhacked home + found Donald + Vic had both

been near there. Vic says it smelt like a hospital. Allan left this morning & girls this afternoon but Englishman named Morris is here. We two the only dudes.

Tues. Sept 6. Went fishing at Baker Lake. Waded over. Morris rode Baby Face. Very windy. Broke rod on stones. Couldn't cast very far. Tried cove where wind didn't blow so hard. Morris got 3 large trout. Lunch with pie, bouillon & tea very pleasant. Found school of big fish at rocky ledge on left side of lake. But they wouldn't take any fly, bacon or fish fin. Left to go to Ptarmigan Lake but still windier there. Cliff

white & Jack Brown fishing there - I recognized Redwing on bank - Cliff got a fish just as I was about to go home. Wish I had gone over to Redoubt which is only ten minutes over ridge - would have gone if I had known it was at top of ridge Came home Gabe & Evelyn (Ted's wife) ahead of me on horseback.

Wed Sept 9. Walk up Merlin Valley. Start about 10 A.M. with lunch. Went high up on rock slide across creek & hit valley at lake. One horse below it in timber - up cliffs to left of lake and crossed valley between lakes & high on right side. Two perpendicular headarmes there quite spec-

tacular. Ate sandwich or two & then on to ridge - very windy traversed it to col & down again Bear track in coulee on snow. Back to lake which was very blue - Buried pie for tea in another coulee. met Donald who ferried me across stream & then home by trail. Bear story in evening

Thurs. Sept 10. Mr. Morris leaves, urging Baker once more for the big fish on way home. Sun low & sleet. Went w. Cliff White to find the hysol spring. Bush-whacked up & down hillside & finally found it - Only a moose wallow - animals go there in fly season, wallow in mud & also urinate there. Bad smell - Cliff Ruen several

Bear story in evening

such places - Came home over
ag lands on hill. after lunch
~~after~~ wrote diary, slept. Evelyn
made candy, Aida cocoa -
Took me all afternoon & evening
to finish this account up to date.
from Aug 16 - while others told
smuggling stories around fire
Friday Sept 11 - Snow over
everything - Took picture of
Pike Peak at 7 AM. beautiful
w. snow in morning light. Went
w. Cliff white & Vic to Merlin
Valley. Took climbing shots on
rock band to right. Cliff taking
w. his camera, then repeating it
for mine - Cloudy & getting
worse so confined photoes to
Skyline shots. Cliff decided to
pull out for Lonise & come back
next week when snow is gone

Vic & I descended to lake, built fire & ate lunch. Left Cliff's share for birds & gophers. Lots of whisky jacks about. Came home by canyon but changed course & bushwhacked up hillside to trail - grizzly bear track on it when but went down in A.M. Snow balls up on edge nails. Saw coyote in Merlin Valley & day seemed to me a typical hunting trip scene. Read Ski book by John L. McCrillis who was at Wallingford Vt. A.M.C. trip in 1931 & listened to Vic tell about his experience in austrian Schools w. poorest conduct of all Republic of Austria

Sat Sept 12 grizzly at back door at 6 a.m. Bobby barked. Ada & I up & fed. Clipping him - went down trail walked up past & saw grizzly on hillside of Fossil. Ada,

Evelyn & I ont after lunch to photo him. Couldn't find him so returned & then went down canyon. Dusky finding it steep & slippery returned to bank & bowled. up on far side of creek. girls heard cough of animal followed by tin can rattling which we all heard. Evelyn ran into timber saying "I can't find one with ~~bears~~ brands on it" Ada hurried up trail calling to me to come. Never found out what it was. Snowing & tracks would be covered. Pack rat in Kitchen that night

Sun. Sept 13. Beautiful day in am. Ada & Evelyn to Lodge on horseback. Took Vic to Natural Bridge for photographic & conversational purposes. The grapevine report was he was hoping to go instead of spending the day on the woodpile. Not much water

over falls & day clouding up. But very pleasant. Lunch over jim at old camp (when we climbed Douglas) No animals abroad except coyotes. Donald wrangling horses. Jim came in while we were at dinner - Bill Cox & wife had good hunt. Camped on White Rabbit (Jim rode in one day - 65 miles maybe) Seemed to have gotten everything but bear.

Mon. Sept 14. Walked up to Redoubt Lake. Windy, snowstorm clouds about. cold. Enjoyed it but didnt try to fish although took my rod along. Fire for lunch on far side where high up I found rock ledge for shelter & small spruce for fire wood w. lots of dead branches & needles. Home in face of wind. Dusky chased bear (grizzly) from back door down trail. grabbed at hind foot as bear slipped on bank. went down past corral where

Donald was. Said heav was running side ways w. mouth open - And was he going? Dusky's stock has gone up in our esteem. Ted & I stood on woodpile & trembled lest Dusky would not return - glad ada was not there - She returned as we finished supper. Brought pack horse our pass alone, drinkin much to eat in face of wind - as jim insisted she come. I had told him to tell her she need not come on my account but he didnt do so. Packrat caught in trap Ted set & we heard skirmish just after we went to bed - a big gray fellow - long whiskers & long furry tale - rather good looking animal for a rat.
