Went to fish Hatchery after dinner & met Mr. & Mrs. Martin - very cordial & talkative - Told us of secret cache but only their son who is in service in England knows where it is. Keen to find it. Dan & Mary MacLean blue when we returned - asked him what lakes they were in paintings above fire place & in George's room. After they left hunted store room for cache but found nothing. Many trunks there but only trash in them plus old shoes & clothes & paint stuff. Billy Wilson Manton came about eight & cut fix stoves, make kindling & fill buckets w. coal & wood

Tuesday July 7. Polly & I made breakfast & got off for Sheplum Mt. about 9:30. Warm but not as warm as yesterday. Wore shorts w. thin bluejeans over it. Worked well. Met Englishman on trail trying to decide whether to go to Renade or Sheplum. Advised Sheplum & travelled little distance with him. Govt pool in full swing. Reached top of ridge to find fine rains on skyline. Jaeggi the Swiss who was hunter for us in 1928 has cabin there & sells lemonade & tea etc. Lunched along ridge with 2 mamma goats & baby. Photoes another younger baby & whiter, fled as we came up. Had lemonade with J. who is going to build cabin for 20 up there. He uses horses. Back about 4 pm. Thursday July 9. Bill Bryant told me in front of the that Mr. Harmon died last night - heart. I saw him a day or two ago & he looked very badly - sort of trembly too. Said Banff had got him, & they were leaving, selling their house & going to coast. Aileen was building house of her own of logs. Ho! she'd never marry - He

liked Banff better than any place he had ever been but couldn't live there. Sort of sad so perhaps best for him. Window shopped, went for mail, did errands etc. mended my film & did odd jobs. Slept in afternoon. went up to see Dan's pictures in ~~aft~~ eve. Is giving them in oak room behind Mt Stephen Hall. Crowded - & number of people from town. Showed old slides & most of lecture was familiar but he calls marmots air raid spotters & otherwise brings things up to date. Harmon told him few days ago that one of these days he would have an invitation to his funeral - the last thing he said to him. Lecture lasted till 10:10 pm. Mother alone in house but didn't seem to mind.

Lots of tandem bicycles in town - Billy Wilson has five to rent. charges $2.00 for all day.

Friday July 10. Polly & I went up Stoney Squaw - by ski trail crossing road often - met English soldier going up, two husky men above us, all en route to ski. hut. It has been relined & also a hut is located at top of ski slope. Road also is staked up Stoney Squaw. We took it & swung trails towards top which is series of rocky ridges we one must cross losing some altitude each time. Stayed on top for hr. & half - wishes for field glasses we. I had forgotten - Saw boat or moose cross Bow R. think it likely to be latter as read in paper that it happened often. Returned by 4 pm - & brought ice cream up from Harmons - Mother & Sig had walked to Fish Hatchery & were not home - asked Frances to have some with us, & just settled down when BHS & Sig arrived - Frances dashed to kitchen but I called her back - Then as we were settled again in came Pres. minister & his wife Mr & Mrs. McNichol so we scuttled away too

fortunately there was enough ice cream so I emerged with tray + served them. They liked it + us + BH G.'s donation so much they stayed an hour. Had 2 steaks for dinner + read Robin Hood stories when in came Henry Kenyon est + little Helen aged 10 - They are at Mount Royal + go to Assiniboine tomorrow until the 22nd, then to ACC camp on the 23rd. Henry told us of the Alaskan group of 12 who are testing out equipment for army in Alaska at base of McKinley - Wheeler Wood + Bob Bates flew a lot of it in - maybe it was Brad Washburn instead - Gibson + Hendricks with them. Former to be in camp to keep track Eric's officers - Storm has 3 girl dudes at camp who helped him open camp - may end up by being this outfit - Henry thinks it will rain tomorrow + sharp shower comes while he is here - Man + wife take sheets from rain on our porch -

Saturday July 11. Clouds low & rain soon. Polly & I gave up trip to Norway. Sorry for Kingmans who are going to Assiniboine this am. Baked ~~scrip~~ for tea when Mrs. Lyell is coming. Mr. Hannon's funeral was this am. & it was pouring. Libya campaign still critical & Russia too. Have radio working & listen at 11 pm on 104.

(nothing there, open 10 - 2 for box holders). then along river where we took 2 pictures for air force man (in blue) of Bridal Veil & Vernal Falls. Then up to hotel & home. after dinner, went down Bow River on Tunnel Mt. side - Good trail near elk fence & came out on high bank above river. Saw herd of elk crossing river far below. Thought them horses at first but later white rumps were conspicuous - Saw a few hoodoos but they seem scarcer than formerly. Came back on Tunnel trail - Saw Vic Kutchera on street but not to speak to. He was looking as usual. A band plays in open air in park near Information Bldg. on Sunday. Hubert Sampson has an apt. & Martha talked to him - Phoned in eve. but he had gone to call on wheelers.

Monday July 13. Sig woke us early & got breakfast so we could take the 8.am bus to Canmore - Two buses leave - Left Sammy's camera case & two films at Rocky Mt Tours for Mr. S. who is going to Field today to meet Sibbald - People at Canmore immediately mentioned "Laurence" so we got directions to trail which starts from Geni's house. He was at Lorne Lunch Cafe. up trail past aneplan spring - blood red blages - Lakes lovely & clear, blues & greens first view loveliest & fine as I remembered it. Benches, fireplace & bronzes some even with stone work - Then through narrow romantic defile of whitemans Pass & down to whiteman Cabin on Spray. Sign to Lakes & to Banff & we turned downstream Ate at river side where stream from pass joined main creek - Mosquitoes bad - goats or not app. visible with glasses - Easy walk down Spray R. about four miles to first bridge, Canyon Cabins. two miles more to second (Youth Hostel) 4 miles down to golf course - As it was 4 miles

from Canmore to point on Spray below Cabin we figure it is 14 miles in acc. Fine view of Rundle - highest point in doubt. Last knot up river is fine single cliff but forward & may not be as high as it looks. Peak on same ridge (as appears from Clubhouse) is not very distinct from above goat hut. Met party at first bridge who were disappointed because they had not seen goat. Foot Sore & weary down Spray. Descended to stream at canyon & had to retrace steps. Lovely blue clear stream with white water. Tried to avoid road on bits of old trail. Came in on sawdust bridle trail just by hotel. Bath, dinner, rest & read Robin Hood. Dan & Mrs Cowans came in about 9 pm - asking Mother to go to Es shaw tomorrow & to see wild flowers which are marvelous there Sig will go with her.

After lunch Dan & Mary came for Mother & Sig & they had a lovely ride & meadows of galardia, green lilies, & tiger lilies. Polly & I to river & canoe up to Second Vermilion Lake. Rain & went ashore under spruce with cow moose for company - Thin ugly creature not at all afraid. Returned after trip to farthest lake again & found 2 reddish brown calves fat, bearish & not spindly at all then. Ran to her & fed - then lay down in woods - only moved on when I tried to land - Saw one bull w - horns in velvet also. Put put's spoil quiet of lake - Seems a pity use of gas

to me. No heaven. Read aloud in eve. & then walked up past hotel & back finding a doe near road on pony trail.

Wednesday July 10th. A beautiful day so Polly & I started for Norquay to climb it from ski hut. Sig got us our breakfast & we left shortly after 9 am. went by river road, then by ski gully to cabin - up ski run to high cabin - Saw grouse drumming on log. Didnt know what it was at first - thought of grizzly, elk, porcupine & then Polly saw it. Cabin door open - Then up our roads with some hard work.

Roped at long chimney where Polly led. Rain came just below ridge & we sat under trees - ate - Then on to ridge as it cleared. went to small summit to left first - then to first big summit to right. Nice bit of climbing along ridge - ate peaches on top for lunch. I drank juice to toast Norquay sheep bed. Blew police whistle we had in pack

Saw two sheep on skyline of ridge opposite (Waquay). Left top about 3:10. Easier descent by practically same route - Passed two picnickers on way up to cabin for supper. Best route is by ski gully - not pedestrian trail. One trail banked with fence, wire covered with canvas. We inspected big ski jump on way down just above cabin - Looks terrifying to me. Have stand for officials + photographers. Met Harry Loder in big gas truck by R.R. He stopped + chatted on road - Is married, lives on Beaver St. + has dog; no children - Then into town by back roads + trails coming through someone's back yard + there was Billie Wilson - Lives in little house opp. Homestead Hotel. Monday July 20 - Trip to Consolation Pass. Edward Terry at head of 25 - inc Polly - I. bunch of Soldiers, Sherlock + Watson, Batts who made primos tea on Summit - went around Lakes on Fishermans trail, over boulder slides up to alpine meadow. Ate every time we stopped. Last time on hill overlooking moraine - Herbert Sampson + some of girls stopped below - Many had no.

axes - many officers had no good nails. Went zig zag up shale slopes in long line like a snake, girls all ahead - Cold & windy on pass where we ate, melted snow for water & took pictures - Then down in long line again - Edward very skilful in choosing route out from those above. Officers comments most amusing - they never knew anything like it before - Took pictures on meadow where some of girls waded in stream - Then home - In before Tower of Babel party, led by Rudolph Brad Gilman & Andrew. They had roped off & climbed up on cliffs of Babel - Moraine Lake side & then came down couloirs towards Moraine Erie at camp fire but no where near as good as Sampson. Matthews of Vancouver rode up the trail on a bicycle wh. caused some comment. A tall slim youth of great enthusiasm

Brad Gilman gave talk on roping up + doing knots at camp fire - Learned butterfly, bowline all over again + Dorothy Richards has one called diver's knot which can be undone in all weathers.

Thirty when we reached stream. Then home early + took pictures by stream one of Tweedy on horseback, when horse stopped in middle of river - Girls in bathing in stream - Matthews tacks on rocks in eye - Told how his pack built bridge over stream in very skilful manner - Lovely sunset + watched from rocks above camp. Hamers + Brad + 15 in all to climb Eiffel - Edward to do Pinnacle + then Temple tomorrow -

Wednesday July 22. Polly up at 4. I decided to fish right after breakfast.

Ralph had gotten me license 2.25 & gave me some raw meat for bait - went to rocks on opp. side - Big marmot ran off with meat wh. was in old lunch bag - but Nan McKaye retrieved it from under boulder - Then she located school of fish & I hooked one with spinner & meat - Nan caught it & killed it, then I hooked another - nice rainbows, have very spotted tails - Then Nan took rod but the sun came out & they turned down our bait from then on - So returned to camp. Washed, built up washstand, under big tree which is in front of our tent. Ate the fish at ~~breakfast~~ lunch, Nan & I to great line from rest of those at table who had pork & beans stew - Then looked for Polly or Bident but Eric asked me to judge photo contest & so I left group there & went to tea tent. The judges were Margaret Fleming, Mr. Stevens & I. We disagreed - Finally called

in Sid Vallance + later Mr. Sampson before we could make decision. Polly got two prizes - "Bergschrund on Mt. Grenville" + "N. from Tupapakitia" + Weibrellot cup to Don Monday for "Mt Tang" a snow field with crevasses in foreground + Mt. Tang in back. Thorningtons arrived just afterwards + we all had tea. Then Polly came in from Bident - very rotten up wall. Made pass in 2 hrs. Top here 11 - 6 hrs. Came down on far side by snow gully. Made home in 3½ hours. Rain, then hail - Cleared after supper + Ian + I again went fishing on the boulder side of lake again - found raft on the beginnings of a beach. After some manoeuvering we got on bow of it. Only had three cross pieces to it but large logs for foundation made it just sea worthy for two, seated cross legged on old tree trunk sheet in front - No place for fish, to kill or land them or keep them, no place for line, bait or implements - Water

pupecky clear down 10 feet in spots but we stayed in shallow part. I asked Ivan if she could swim. She said no, not much in this water. Watched schools of fish around us - began to catch them but pulling them in to nowhere was a problem - Ivan very good at it. I stuck them with knife when all else failed. Got four + then brought raft in for Louis the cook + boy with him who was fishing from shore - Boy went out on raft but didn't seem to catch any. fishing with bait apparently. I still used spinner + bait + caught three more. Cleaned them while Ivan fished but none bit. Tummy + dont ask why. Struggle back over the boulders, wet + rocks slippery - tried + fell couple of times in lake or water hole between boulders - Ten-thirty when we got back put fish in pan in cook tent. hoping to have them for breakfast. Seemed warm steel at first. Sibbald had talked earlier on wireless

Thursday July 23. Louis too busy to cook fish for breakfast - off at 7;45 to climb Mt. Bell - the peak to left of Consolation Pass. Bea de Lacy scratched because of bad cough wh. kept her (+ us) awake a good deal. Canfield leading + Bob. Hinds - with Gladys Hartley, L.G + Bert Brink on one rope, Peg Wiley, Jean + Sid Vallance on second - Rands (2) of Calgary, Mrs. Miller + Mary. Fleming came as far as Taylor Lake Pass but us further. Left last two behind on first boulder slide the Rands in Larch meadows. They are to do Temple tomorrow. Upon pass one looks down on Taylor Lake, shaped like Africa, + across Bow Valley to Castle Mt. Sid + Canfield doing pictures of flowers - Roped above pass. Bob taking to couloir + Canfield going to hunt route to left - Loose rock abundant but that underneath quite firm - much better than any of us expected. Bob hunting hand parts - Canfield way ahead. Bert very good. Gladys fast

climber but not always mindful of rope. Couldn't get up one place as there was no step at all. Bob used twisted foot technique in large crack. I got a boost & a pull. Snow below Summit so we had water from ledge below - Pictures, glasses, food, identify nuts & passes - good view of Ball group. but is confusing - Couldn't locate Ball Pass. Down ledges & scree to Cons. Pass moped. Got foot caught bet. 2 rocks & got behind. Storm brewing over Mt Temple & some hurried on. Camp at 5:30 pm. washed - Lot of girls in camp all day, arranged tableaux for camp fire. Rain forced us to ~~tea~~ tent by fly. Sampson & Sibbald told tall tales Tableaux were good - Napoleon crossing the Rhine (bacon rind) Nero fiddling while Rome burned, Lady godiva (Bea) "Bicycle built for Two", She wore a yellow ribbon with baby coach made of box w. can lids tacked on for wheels - Aletta the Stage manager

Friday July 24. Polly off for Mt Bell with Andrew & Brad, the latter taking 3 soldiers. Edward in camp after doing Temple & Pinnacle & staying at Larch Valley camp. I suddenly decided it might be good time to go to Banff. Rick going to Moraine & to get car to London if plane works. Dorothy Hay has call & decided to go too. Went fishing & got three fish one quite nice, & got two more from boys at cook tent. Helen Pelmer cleaned them for me & we did them up in moss & bags, then rainwear & they travelled nicely. Short walk to Moraine Lake but my watch stopped Dorothy's was very fast & we were in a fog as to the time. Canvassed people in campground for ride & found one couple who could take one of us. Then two boys came in Packard car & they could take us both, & were going to Banff. Found out later they

were man (light hair blue eyes looked like Henderson Supplee) from Ontario + Bert Sibbald - a relative of Mrs. Jim Brewster + had Brewster's car for the afternoon. Just went to Moraine + were content with one glance + return - Their idea was push to drive wh was lucky for us as they took D. to the club house + left me at Jenkins grocery store - There I ordered some stuff for Rick to be sent to Louise + walked in on family. They were having the McCowans for dinner - The fine fish were a problem but we finally had a fish course followed by fried chicken. very sleepy + tired + cold no better.

Saturday July 25: Rainy + rained most of night - Will not go back to camp until it clears or my cold evaporates - McCowans offered to drive us all to Moraine but that's off till tomorrow. Got Tweedy some whiskey + also package for Mrs. Sherlock that was expressed at station. Wrote

Polly & Helen Gillmer a joint letter sending fishing license, & also box containing fishing spinners & leaders. Polly can use box to send in her films to Hobbles - wh. I forgot to bring in. Read last Monday & Sundays Inquirer wh. Dan brought us from hotel last night - See Nuiss Court hearing was to be held Wed. I think. & people were protesting low increase in relief allowances - War news bad but might be worse - holding w slight gains in Latvia & Russians withdrawing a bit around Rostov & Don - some counter attacks. Downtown once for errands - Bath & bed early. Trail Riders went out yesterday & I'm sorry for them. They often have bad luck it seems to me.

Sunday July 26. Clouds very low but ceiling blue sky - May burn off as wind seems right. Sig went to McCowans to tell them we wouldn't go but that it was Muskrat St. instead of Marten St. &

they turned up here hope she got them
They will go anyway. Their horse
is just back of Simms' lumber yard.
Bill Ennis (?) is at club house & will
drive to Moraine but doesn't want to go
in bad weather - So Sherlocks package
& Tweedy's whiskey lie here with no way
to get to Moraine. Sat by fire & wrote.
with weather getting no better nor
my cold either. In afternoon went
up to club house & looked at 100 feet
of new movies all by myself -
darkening room partially & using
one corner only - Sid & Allance in from
camp. Saturday was wet & mean -
Richards was to lead sunrise & Polly was
off on private climb. The army's show
was very clever - showed climber going
to bed & dreaming take offs of camp.
But 2 officers were quarantined in
Mens drying tent w. sore throats &

Walked rest of way to Paradise Creek. Then up river - at campsite cross trail to Chateau on right, to moraine to left. Tried both & neither looked like Paradise Valley trail so came back, passed through horse corral & went on up creek. Trail swampy in places, wind falls, willows But kept on till side stream & narrow valley indicated real route from Louise must be not far to right. up side stream to main trail & on to junction of trail to Annette to left & Giant Steps to right. Took left & run into couple on bridge over stream. Then on to Annette Lake & bathed feet. very cold. Couple arrived & after few minutes they started around lake & up shale to right. Paradise Valley.

Lunched at bridge at ACC camp site of 1933. Making coffee from Glacier Park supply of last year. Not very good. Inspected camp fire circle on proper left of stream, found bear tree where Vallance took pictures which was blown down now; saw us. g fire places around. On to giant steps on main trail to upper & then return by lower. Pictures but sun was in wrong place & in part of time. Came down valley on good trail wh. leads far up hillside, going up all the way home. Decided not to return to auto road as couple said they did it in 2 hrs. Another couple at giant steps feeding ground & mine & third couple on horse back w. guide coming out. - Seemed long way home Took old trail through avalanche blow-downs at one pt for few hundred yds. Tried when home at 6:45 pm. At Cake w. Sig in evening & sunset fire

Rock Rabbit.

Tuesday Aug 18. Sig had found a rock rabbit up at rock pile near end of lake & so we went up to get pictures Took telephotoes of him when he came out soon after seen him pile hot very fat & sleek & only saw one so think others may be in bed for winter altho they dont actually hibernate So says Dan. He came very near Sig who had light green dress whereas I had dark blue jeans; Bert I passed with camera. Surprised to see black bear coming down trail & feet like the hunters in the picture in Cute's room - two hunters intent on sheep while one calls attention of companion to grizzly on hind legs behind them! Stayed on rocks there in sun till one o'clock but took 50 feet - one still. Headachey from sun in aft. & lay on Cute's bed - mother on porch. She went to Lake yesterday but finds porch very comfortable & prefers to stay there. The Leiks & Carson Simpson

came in from Temple Lodge yesterday - Preparing to go to O'Hara to camp tomorrow - Sig + I again at lake in eve. Black bear named Charley around Lodge a lot + much picture taking. Simpson says there is a road into Castlegard but by C.O. camp - but I doubt it - nearly up to Sask R. I guess.

Wednesday Aug 19. Watched people off in buses to Wapta + O'Hara + to Moraine Lake - Then with cameras went up trail to Fairview Lookout. at timber line - a platform + bench. Lake beautiful + calm - the painted rocks reflected in it. Took number of pictures, mostly vertical stills. Down on good trail to rock slide which is marked "Danger" + then down to lake + back near shore. Water high + path is ~~over~~ under water at one place. Watched small fish jumping for millers caught in water. Many

robins surprised on ground in underbrush. Home & on balcony w. Morton till lunch then pack & down on 4pm bus to see Bill & Liz off to Banff bus, but take second train after all. As I missed bus up, & couldn't get Rocky Mt. I begged ride from a Washington couple. Gave them enough information to pay for ride. They ate at Deer Lodge tonight, were staying in Banff. Edward Jeury who is eating here, joined me for dinner & then I walked over to chalet to see Hettie & Mrs. T. who is up. Hettie married to garage man in Golden. Gertie saw me in Golden last year. All listening to news. Then back to take sunset but was not good enough. Wrote up this diary & then to bed.

Thursday Aug 20. Rain in night & still so this am. But some signs of clearing. ordered lunch & started anyway to go over "goat Pass & down to Lake Minnewagon & O'Hara

Trail. Had thought of going to Little Beehive & working around on contours. Edw. Fay advised not & was well as it would not have done. 1 hour to Mirror Lake & 1/4 up to Agnes. Edw. saw me go by & tried to catch up with Mrs. F. & Hattie - Sat out sharp rain on tea house step - Then on, passing number of marmots at end of Lake. & up into basin. Large goat appeared from nowhere above. Stalked him up through scrub spruce & rocks but he was half way up Lichlook before I reached pass - Rain intermittent sun out once or twice. Bleak pass & all shale on other side. Nine goats on grassy slopes of further side of Lichlook & I go over skyline very soon after I appeared. At pass at 12. but decided to eat in meadow below with fire. Down hardish shale & scree to boulders of moraine. Took direct line to right first but then switched to mossy

boulders as others were very wobbly. Lovely little lunch meadow & clear stream moss banked. ate in narrow coolie by stream with large rock for protection from the strong wind. Left at 2 pm & came to lake. Tiny game trail ran along left side - other side rock slide - Valley looks straight down to Bow - STarted down rocky cascades on right, switched to left at first canyon. BushBushwhacking through trees on mossy slopes - Crossed again to right where tiny trail led down boulders & cliffs. Came out often on bluff but always a way out. Switched once more to left side before coming out suddenly on S' Hana trail - Quite a fine waterfall there & lovely cascades on whole stream. Edw. however says it is sometimes dry. Reached home at four. Had milk shake at soda counter where I met the Straughns, he paying

for mine too. Thanked him & was asked to have drink before supper. Rested & read last of Sherlock stories Bath. Then a whiskey at. 312 his room & dinner with conversation mostly of Rockies & my climbing. He is in retail store business in Milwaukee, asked about stores in Philly - where we shopped etc. Read albertan of Canadians said at Dieppe about can't tell from stories of how successful it was or wasn't. Said goodnight to Heagleys in their room where Edw was talking about climbs etc. Raining & prospects for tomorrow are poor.

Friday Aug 21. Clear & getting clearer So arrange to go to Moraine Lake. Leave on 10 am bus. Companions - one woman who made round trip & one couple who went to Sentinel Pass. His name Arnold Bowman & hers Enid (?) Found later she had worked in front office of chateau & also was at Jasper last year - He was

Larch Valley.

a bit cuckoo saying "Hello Enid" every few minutes & comes up to Louise every year. Is a Swiss & live in this country 10 yrs. They went straight to Sentinel Pass. I to Mirror Lake which is short distance up Consol. Valley & on the newish trail from Boom Lake wh was cut for the trail Riders known as the Sky-line trail but seemed to be in timber to me. Nice view of #6 & #7 peaks & grand moore place. Return to Moraine Lake & started up to end of lake expecting to eat lunch on lake shore. Ate beyond lake by stream & then Kept on to Eiffel Lake. Remembered there was lake up there with large tree by shore trail - found one puddle & one lake separated by moraine - Has lake seeped away? as tree was nearby as I remembered it or was my memory faulty. Probably Cathy met woman on trail whistling & seeing to scare away the bears - Ted husband was up on Mt. side somewhere but

soon rejoined her I think - She said she didn't think any other woman was in the valley. Saw one black bear mark on trail. Lots of rock rabbits & marmots in valley. Cut up to trail to Wenchemna & returned on it to level of Larch Valley & then cut up to ridge leading to Eiffel Int. Lovely larch covered ridge & timberline looking down into basin at foot of Eiffel where seven goats lay about or grazed on rocks above tiny lake. Could have descended shale couloir to them but decided to walk down larch ridge which was lovely. When I reached stream & found strong wind right down valley from the goats so stalked up after them. They had moved on but I followed, camera in each hand & reached ice ax left on hillside. Got to within 75 feet of them, then they came off up shale. In shadow but took pictures any way. Then returned to meadow where Acc. camped - ate & lay in sun. That couple had probably gone down when they

Larch Valley.

appeared walking slowly down trail. Had heard someone in valley when I came out on Larch ridge but couldnt find them even with glasses. Arnold said two boys had come over pass + were travelling fast. He built fire in old ACC stove which had been left there + made tea. also cup of cocoa for me from camp supplies found there. He's good natured + at home in the woods. Wet Fay beautiful there in setting sun - We stayed till sun was off larches in front of us. + moon came up a luminous half ~~globe~~ disc right on Fay ridge. + then down trail - two fine bucks, antlers in velvet, in small clearing - Two boys with one duffle carried on shoulder by one of them, coming up trail to camp at Larch Valley + climb Temple tomorrow In air free - Reached Moraine Lodge just at 8.30 + bus waiting with only one passenger but brought boys out too. Bear at Lodge who used to be at Buffalo Park (got lunch by one few years ago)

wondered how I got up to Lake Valley. I guess he thought I was still at Consol, wrapped up in red blanket or ride home in 3 seated bus. Late supper at Deer Lodge of soup toast & jam with Arnold & Enid & then to bed.

Sat Aug 22. To Banff on 9 am train In observation car & conductor never took my ticket or charged for seat! Ernest on train & also Arnold & Enid. Arnold to go to Assiu with Storm who was at Banff Sta to meet him. Asked me if he had glamour! Family fine & glad to get back "home". Deer Lodge breakfast is cold - toast, muffins or rolls; only one cup of coffee allowed - Long waits for service almost as long as Chateau. Woman in dining room said to be manager. Miss Sibley (?) sister of Mrs. Crosby runs to visit Fred Crosby (Robin's the ski champion) Tall man in office is familiar looking but nobody knows his name. Beds are most comfortable & bureau & desk quite
